

Promoting and Tracking Environmental Sustainability in VET

Objectives:

- To improve the recognition of green skills among those working in vocational education and training
- Increasing the transferability of green skills among VET students
- To promote the transfer of good practices in environmental sustainability among VET organisations

RESULTS ACCOMPLISHED:

- The **EnviroVET Best Practice Toolkit** brings together good practices that are currently being used in VET institutions.
- The **EnviroVET Environmental Charter** sets out the minimum requirements that a VET organisation must meet.
- The **EnviroVET Environmental Impact Measurement Tool** is an online, open, digital assessment tool that allows users to check the impact of their organisation on the environment.
- The **Facilitator e-course** is a freely accessible, 30-hour online course designed for VET professionals working in the VET sector. Available soon
