ENVIRO VET
PROMOTING SUSTAINABILITY IN VET

WHAT IS THE PROJECT ABOUT

The project aims to support the **professional development** of vocational education practitioners **environmental awareness** by tracking and quantifying the **environmental impact of the sector**. The project will also engage vocational learners, educational policy makers and work-based learning providers to become true agents of environmental change within the European vocational education and training sector.

GOALS

- Increase recognition of green skills among **75 vocational education practitioners**.
- Increase uptake and adoption of green skills among **200 vocational training learners**.
- Implementation of environmental and sustainability best practices among **30 vocational education and training organisations**.
- Establishment of an active, focused network for staff and organisations to exchange resources, knowledge and best practices.
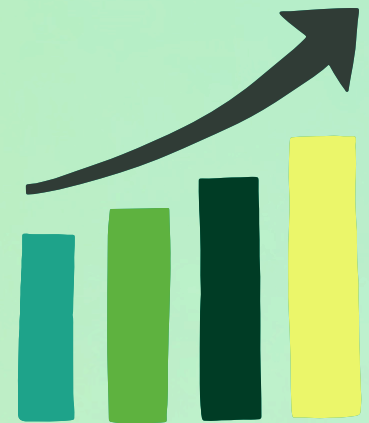

EXPECTED RESULTS

1. **EnviroVET Best Practice Toolkit** - a compilation of best practices, case studies and success stories from across European vocational education and training.
2. **EnviroVET Environmental Charter** - will set out the minimum requirements that VET institutions need to meet in order to consider themselves to be environmentally compliant.
3. **EnviroVET Environmental Impact Measurement Tool** - an online evaluation tool will allow users to compare and exchange best practices on environmentally friendly approaches to vocational education and training.
4. **EnviroVET Facilitator eCourse** -30 hour e-course on green approach will target professionals working in the VET sector by equipping them with relevant skills and knowledge.

- Improved understanding of possible ways of applying green skills and how they influence the environmental issues. Increased quality of VET provision
- Improved offer of vocational learning and training opportunities.
- Impact on VET professionals (trainers and practitioners)
- Improved understanding of using green skills teaching resources.
